

<b>description</b>	▶ Whitish powder made from finely ground recycled gypsum boards that is a practical and economical source of calcium and sulphur with very little effect on soil pH								
<b>benefits</b>	▶ Neutral salt with little or no effect on soil pH ▶ Very small amount of calcium carbonate ▶ Provides calcium in the sulphate form ▶ Calcium in the sulphate form which makes it more available to plants ▶ Soluble calcium moves deeper in the soil ▶ Supplies calcium to the sub-soil horizon ▶ Can reduce the amount of free aluminum in the soil thus allowing better root development ▶ Contributes to soil flocculation								
<b>fertilizing value</b>	<table><tr><td>▶ Calcium (Ca)</td><td>24.0%</td></tr><tr><td>Sulphur (S)</td><td>17.0%</td></tr><tr><td>Calcium sulphate</td><td>81.0%</td></tr><tr><td>Calcium carbonate</td><td>≤ 7.75%</td></tr></table> <p>Average values from analysis, dry matter</p>	▶ Calcium (Ca)	24.0%	Sulphur (S)	17.0%	Calcium sulphate	81.0%	Calcium carbonate	≤ 7.75%
▶ Calcium (Ca)	24.0%								
Sulphur (S)	17.0%								
Calcium sulphate	81.0%								
Calcium carbonate	≤ 7.75%								
<b>moisture</b>	▶ <u>Between 15 and 25%</u>								
<b>characteristics</b>	▶ <u>Passing a 100-mesh sieve</u> 90.0%
