Pür Combo

**Agro
100**
cultivating innovation

Pür Combo is a liquid nutrient well-balanced in magnesium and micronutrients and easily assimilable in order to rectify and prevent deficiencies with foliar applications. **Pür Combo** contains amino acids obtained by enzymatic hydrolysis that stimulate the physiological processes of the plant, absorption and mobility of nutrients in the plant as well as establishing resistance mechanisms against abiotic stresses (extreme temperatures, lack or excess of water, salinity, agrochemical products, etc.). The synergy between the elements activates many vital processes as well as the crop's yield inducing factors (cellular division, photosynthesis, flowering, sugar synthesis and transport, hormone and protein synthesis, etc.). This product must only be used on the basis of a soil and/or tissue analysis. For more information on **Pür Combo**, consult your agronomic adviser.

agronomic benefits

- Prevents and rectifies many deficiencies
- Broad spectrum of effectiveness on every crop and every type of soil
- Better use of nutritional elements
- Resistance against stresses
- Yield optimization

density **1.261 kg/L**

2.5% S + micros

Liquid nutrient with micronutrients

Guaranteed minimum analysis

Sulphur (S)	2.5%
Magnesium (Mg)	1.2%
Boron (B) (actual)	0.6%
Copper (Cu) (actual)	0.25%

Iron (Fe) (actual)	0.6%
Manganese (Mn) (actual)	1.2%
Molybdenum (Mo) (actual)	0.6%
Zinc (Zn) (actual)	1.2%
Amino acids	2.5%
Citric acid	5%

Foliar application

Application timing and remarks

During periods of rapid growth.
Apply before deficiency symptoms appear.
Water volume: at least 200 L/ha (21.5 gallons/acre).

As soon as leafage coverage is sufficient.
Water volume: at least 600 L/ha (65 gallons/acre).
Do not use this product when fruit coloration and maturity may be delayed by nitrogen application.

Soil application

Consult your agronomic adviser for the appropriate dosage for your conditions.

directions for use

Mixing and application. Shake well before using. Fill the tank three quarters full. Start agitation and add product. Clean the empty containers and add the rinsing water to the tank. Add the rest of the water and apply without delay. Do not apply under drying conditions and when outside temperature is too high otherwise culture may be damaged.

Tank mixing. This product may be tank mixed with pesticides. In some cases, tank mixing with pest control products can result in physical and chemical incompatibilities which may impact the efficacy of the products and the crop performance. Always read and follow label directions of the tank mix partners. Consult the pesticides manufacturer representatives and an Agro-100 representative to help determine the safety and agronomic outcome of the mix.

Compatibility. This product is compatible with most agrochemical products except phosphates. Check compatibility before mixing in application tank or check with your adviser. **Check compatibility as follow.** In a clean, transparent jar, add the water and other products, one by one in the same proportion as proposed application. Agitate gently. Let the jar sit for 30 minutes. Incompatible products will form flakes, sludge, gels or other precipitates. Separation or layering may appear. Do not apply in case of incompatibility.

Storage. Avoid freezing.

Caution. This fertilizer contains boron, copper, iron, manganese, molybdenum and zinc and should be used only as recommended. It may prove harmful when misused. This product contains soy. Adverse reactions may occur in sensitive persons. If skin contact occurs, wash with soap and water. Wear dust mask and protective gloves. If allergic reaction occurs, seek medical attention. This product must be used as complement to a soil fertilization program based on soil or plant tissue analyses.

Guarantee. The vendor's liability will be limited to the terms of this label. The buyer will then be responsible for all risks and damages to persons or properties resulting from the use of this product, and hereby accepts these conditions.

Apply at suggested rates. Water volume: at least 200 L/ha (21.5 gallons/acre).
