

**benefits**

- ▶ Direct action on the soil's pH level
- ▶ Simultaneously provides Ca, K, Mg and S
- ▶ Approximately 50% of the lime is active in the year of application
- ▶ Fast acting and durable
- ▶ Economical source of fertilization
- ▶ Also supplements micronutrients

**fertilizing value**

Total potassium (K <sub>2</sub> O)	4 to 7%
<b>Potassium (typical value)</b>	<b>6%</b>
Magnesium (Mg)	0.4%
Sulphur (S)	3.5%
Manganese (Mn)	221 ppm
Zinc (Zn)	897 ppm
Copper (Cu)	10 ppm
Selenium (Se)	9 ppm

Average values from analysis, taking moisture into account

**liming value**

Neutralizing capacity* (BNQ 696)	63.8%
Real neutralizing capacity**	74%
Calcium (Ca)	26%
Moisture (approximate)	20%

\* Calculated in accordance with the method used to establish the index of agricultural lime at 100 mesh, dry matter

\*\* Incubation test 2003, Université Laval, taking moisture into account
